

You can easily enter or edit your own forage lots at the above web address. Haylist gives you an **ID Number** the first time you enter your name and phone number. You should keep the ID Number for future reference as it will be needed to add new lots or update/delete any lots you've already entered in the system.

Please note that the Upper Midwest Haylist accepts only one price per **TON** for each lot. A lot is any unique combination of forage type, form, cutting, and quality. Make a separate entry for each lot (units in tons).

Required items are preceded by an asterisk ().*
